

CASA DE LA LUZ

Casa De La Luz, Spanish for “House of Light”, is a nearly 7000 square foot premier hospice care facility. The existing building was reconfigured and brought up to the most current health and safety codes as well as providing what terminally ill patients and their families need most: relaxing personal space and treatment with respect, relief from pain and remembrance. Casa strives to accomplish all of this for every patient.

In addition to the interior improvements a plush exterior courtyard filled with plants and natural light was defined. A new covered entry way made of masonry and steel was another addition to the facility.

In this case, Bright Design Associates worked with the owner to create an environment that the patients deserve and appreciate.
